

Bovine Serum Albumine

Fraction V, US / NZ origin, Purity of 99%

Description

Bovine serum albumin or BSA Fraction V is a protein solution from calfs. BSA can block vacant binding sites in enzyme-linked immunosorbent assay (ELISA) in both poly-L-lysine (PLL)-treated and non-treated micro-wells.

Qualities:

- Low Endotoxin
- pH 5.2
- and more

Advantages:

High purity > 99 %
Reduced lot to lot variation
Low BSE/TSE risk
US, Australia or New Zealand origin
Complete documentation for Import and Export
Different variations and fillings available

Size: 5g up to 10kg

Origins: US and New Zealand

More information

- Samples available
- Reservation time: 6-8 weeks
- Store for 3 years or longer
- Liquid & Sterile filtration on request
